Mississippi State University College of Veterinary Medicine (MSU) currently uses TimeClock Plus as their time clock system. We are seeking a vendor that will either continue to support the current system or a vendor who will match the needed features and integration(s) of the current system, migrate the existing data to the new system, and to support or replace the existing time clock hardware. We would like this system to be hosted on the vendor's server/cloud.

MSU would like the option to renew these services on an annual basis for an additional four (4) one-year periods, not to exceed five (5) years total. Please either provide firm pricing for the annual renewal or explain how annual price will be determined in your response.
